Work Experience

Software Architect/ Team Mentor

Sept 2012 – Oct 2014: Boshra Tech, <http://persiangig.com>

Created a RESTful platform based on Spring, Jersey, eclipseLink for Boshratech Company (persiangig.com) to develop Cloud applications. working with geographically distinct teams. mentor other developers and provide support in order to solve ongoing defects. using postgresql, Maven, SVN, git and also Redmine as Scrum Project Control. testing the platform by junit, Grizzly Container and Mock framework. Deploying and configuring Apache Tomcat to support more than 10000 concurrent users. Using Atmosphere framework and Redis to create a real-time (SPA) web application based on websocket. Created a desktop application that lets users manage their photos, docs, and videos anywhere and share them easily. Developed an android application for uploading user's photos to their web panel. Last but not least using jboss pressgang for technical documentation. Using mongoDB to store analytical statistics with Spring data for cloud-hosting.

Senior Software Developer

Dec 2010 – April 2012: Payeshgaran, <http://payeshgaran.biz>

fixed hundreds of bugs in a web application based on Struts and Hibernate. Rebuilding UI by using Wijmo framework. Implemented loan as a part of life insurance software. Created a framework based on Spring, Spring MVC, Hibernate and JQuery to develop insurance softwares. Using Enterprise Architect as a tool to ease development process. Using Jira as a task management and Project Control. Using LogicalDOC as a DMS to gather user requirements. Developed Persian Date Picker for LogicalDOC with SmartGWT. Implemented a time sheet for controlling employee working hours by Adempiere. Worked with a team consist of 30 people

Senior Developer / Software Architect

Dec 2008 – Aug 2010: Informatic Research center (DAKA), <http://www.rcii.ir>

Play a pivotal role in the development of application. Assisted in the development of Software Automation based on Adempiere (an open source ERP) in a team of 2 people. J2EE web application development with Jboss Seam. Worked as a full-stack Java Developer to Implement 2 projects for ministry of Ershad as an analyst, designer, developer, tester by using Seam and postgresql. Deployed on Jboss AS.

Software Developer

May 2007 – Oct 2008 : Solico food industrial group (Kalleh) , <http://www.solico.ir>

Supervised entire software development life cycle from analysis of clients needs to prototype. Performing gap analysis between goals and existing procedures/skill set and system improvements to increase productivity and reduce costs Implemented business process with Adempiere (An open source ERP with 800 tables). Responsible for localization and customization different modules including Payment, Purchase, Sales, Inventory, Accounting, Work Flow management and so on. Added Persian Date Picker to ZK web UI and Swing UI. Added RTL(Right To Left) feature. Worked with a team consist of 8 developers and analyst. Migrated data from Microsoft Access to Adempiere.

Creator of Khaas/JEDLab co-founder and CTO

JEDLab : Java Education & Development Lab offers online Java video training. Visit <http://jedlab.ir>

Khaas : is an intelligent Android app which can make witty remarks and even tell jokes. Download it [here](#)

Fanpardaz Inc.

Present

Working on web based enterprise project management software.
Implementing multitenancy using Hibernate
Implementing workflow engine based on JBPM and Jboss Seam
Implementing macro-frameworks on top of Seam to ease development process
Integrating and Configuring Jboss eap to build powerful real-time web application

Educational Background

- 2002 – 2007 – Aptech
 - Degree: ACCP (Aptech Certified Computer Professional)
 - Persian Social Network
- 2010 – 2012 - Qazvin University
 - Degree: B.A, English Translation.
- IELTS 6.5

Additional Information

An accomplished Software Engineer specializing Object-Oriented Programming with extensive experience in the programming, Design , implementation, testing and maintenance.

Summary Of Qualification

- Possess expertize in Java development
- Strong knowledge of Java
- Solid management skills, demonstrated Proficiency in leading And mentoring individuals to maximize levels of productivity While forming cohesive team environment

Objectives

I've spent a lot of time working on elegant and powerful tools and frameworks that have enabled me to create terrific applications. I'm looking to join a team where I can learn and create something amazing!

Technical Expertize

Programming Language : Java, HTML, Javascript, Ceylon

Frameworks / Platform :

JSP, JSF, Richfaces, Primefaces, EJB3, JPA, Hibernate, eclipselink, Servlet, JSTL, JBOSS SEAM, jQuery, Spring framework, Android, JBPM, RESTEasy, Vert.x

IDE : Eclipse, IntelliJ idea

Operating systems : Linux (Fedora), Windows 7

RDBMS : PostgreSql, Mysql

Web / App servers : Tomcat, JBoss AS

Testing frameworks : junit, TestNG, Arquillian

Version Controls : subversion , git

Build Tools : Ant , Maven

Documentation Tools : JbossPressGang, AsciiDoctor
